

AQUAMIX

“AQUAMIX” WATER SAFETY SURFACE

AQUAMIX is the ultimate option for wet surfaces, providing a flat yet slip resistant finish with impact absorbing qualities. With system options suitable for internal and external applications, high chlorine resistance and an overall seamless finish that can be installed on flat and graded sub-bases, AQUAMIX is the surface solution for your water play project.

MATERIAL

The finished surface is constructed entirely from EPDM rubber crumb bound with a single part polyurethane. If higher fall height requirements are required, a recycled SBR sub base layer is also used in conjunction with the EPDM finished surface. They contain no hazardous materials such as wire, or added heavy metals. A seamless insitu one-piece application, without joints.

APPLICATION

Pools ▪ Water Parks ▪ Beaches ▪ Splash Pads ▪ Spas ▪ Steam Rooms ▪ Bathrooms ▪ Pontoons ▪ Marinas ▪ Playgrounds ▪ Pedestrian Bridges ▪ Ramps ▪ Steps

SITE PREPARATION

Under normal circumstances a minimum 100mm layer of structural concrete is required as the systems sub base. Contact Surfacing Contractors Australia Pty Ltd for further information, All site preparation can be performed by Surfacing Contractors Australia Pty Ltd if required.

COLOURS

Up to 18 colours and many speckled combinations are available in the PlayKote Range

Custom shapes, letters detailed designs and 3D construction are available to add additional play value. Aesthetically appealing, a colourful surface allows you to colour co-ordinate or design your specific area, or to blend to match existing colours to achieve minimum impact.
