

EQUIMIX

“EQUIMIX” EQUESTRIAN SAFETY SURFACE

EQUIMIX is composed of small irregularly shaped pieces of recycled rubber providing a clean, constant, impact absorbing surface. This translates into less muscle strain and injury, allowing your horses to perform at their best.

MATERIAL

The surface is constructed entirely from recycled tyre rubber. Contains no hazardous materials such as wire, or added heavy metals.

The system is also available in synthetic EPDM rubber, offering 18 bold colours, allowing colourful design to be incorporated into your equestrian project.

The urethane binder naturally inhibits and is resistant to the action of fungicidal or bacterial growth under normal circumstances, irrespective of ambient humidity and neither the rubber or urethane binder contain any products that could present a toxic hazard.

APPLICATION

Horse Pathways ▪ Horse Ramps ▪ Parade Rings ▪ Equestrian Pools ▪ Horse Walkers ▪ Horse Trailers ▪ Stable Floors ▪ Veterinary Surgeries ▪ Wash Down Floors and Walls ▪ Loading Bays ▪ Mounting Bays

SITE PREPARATION

Under normal circumstances a minimum 100mm layer of PM21 or similar road base compacted to 98% density is required as a base for the surface. For Equestrian systems it is ideal that the surface be laid over concrete bitumen or pavers. Contact Surfacing Contractors Australia Pty Ltd for further information, All site preparation can be performed by Surfacing Contractors Australia Pty Ltd if required.

COLOURS

Playkote 1mm-3mm SBR

Recycled car tyres, black colour
