

PLAYmix

ATTENUATION IMPACT PLAYGROUND SAFETY SURFACE

PLAYMIX is a single layer and bi-laminate playground safety surfacing system which is poured on site and is suitable for use under and around fixed or portable playground equipment. The resultant surfacing systems are independently certified as capable of absorbing impact within limits defined by AS4422:1996 to a fall height between 500mm - 3000mm.

MATERIAL

The surface is constructed entirely from recycled tyre rubber and synthetic EPDM rubber. Contains no hazardous materials such as wire, or added heavy metals.

The single part urethane binder naturally inhibits and is resistant to the action of fungicidal or bacterial growth under normal circumstances, irrespective of ambient humidity and neither the rubber or urethane binder contain any products that could present a toxic hazard.

APPLICATION

For application around and below playground equipment where formal impact absorption measured to AS4422:1996 is required. Surface is laid on-site, in-situ. Suitable for use by the disabled and provides access for wheelchairs, prams or bicycles which is not possible with loose fill materials.

SITE PREPARATION

Under normal circumstances a minimum 100mm layer of PM21 or similar road base compacted to 98% density is required as a base for the playground surface. It may also be laid over concrete bitumen or pavers. Contact Surfacing Contractors Australia Pty Ltd for further information, All site preparation can be performed by Surfacing Contractors Australia Pty Ltd if required.

COLOURS

Playkote Precoat SBR

Available in 14 vibrant colours suitable for the harsh Australian climate

PlayKote EPDM

Available in 18 colours with exceptional EPDM content of > 24% (proven through independent testing)

Hopscotch and other games can be applied where required (POA)
Custom shapes, detailed designs and 3D construction are available

If you are looking for quality surfacing, Surfacing Contractors Australia can help you find the best solution for your needs and requirements, give us a call now on
