

PlayMix Basic

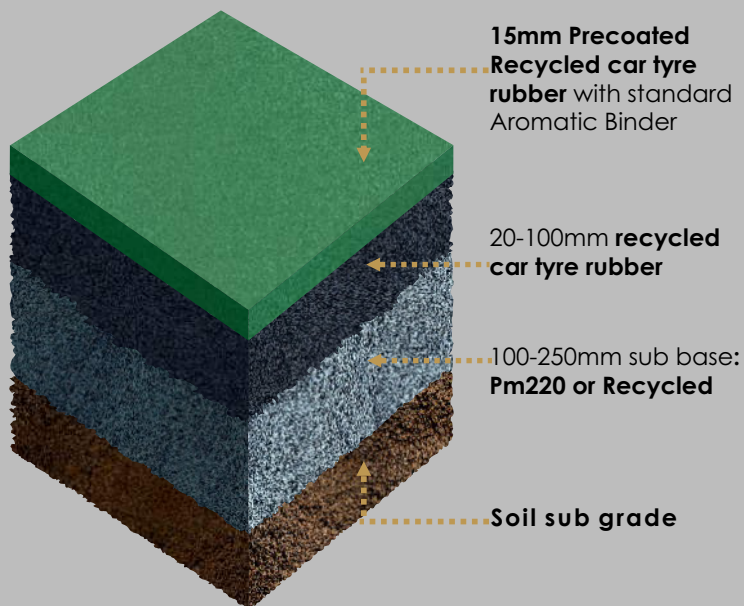

BUDGET SAFETY SURFACING

PLAYMIX BASIC IS A SMART, FUNCTIONAL CHOICE FOR COUNCIL PLAY SPACES, SCHOOLS, AND CHILDCARE CENTRES.

MADE FROM RECYCLED CAR TYRE RUBBER, THIS ECO-FRIENDLY SOLUTION IS IDEAL FOR EARLY CHILDHOOD AND LOW-USE ENVIRONMENTS, OFFERING LONG-TERM VALUE WITHOUT COMPROMISING ON SAFETY OR SUSTAINABILITY.

KEY BENEFITS OF PLAYMIX BASIC

- ✓ Shock-absorbing & slip-resistant for safer play.
- ✓ Made from recycled car tyres, reducing environmental impact.
- ✓ Outlasts loose-fill softfall options.
- ✓ Minimal ongoing maintenance costs.
- ✓ Cleaner & safer than sand or mulch alternatives.
- ✓ Porous surface supports water management when paired with thoughtful design.
- ✓ **AS4422** compliant & independently tested.
- ✓ **AS4586** certified for slip resistance

PlayMix Basic is a bi-laminate safety surface poured on-site, ideal for early childhood and low-use play areas. Suitable under fixed or portable equipment, it's certified to **AS4422:2016** for fall heights of 500mm to 3000mm.

The system combines **Playkote Precoat** with **high-quality aromatic polyurethane**, with both surface & base layers made entirely from **recycled car tyre rubber**, offering a **cost-effective, impact-absorbing & sustainable solution**.

SPECIFIER'S NOTE: To specify, include the following in documentation: "Surface system to be supplied and installed as per Manufacturer and Installer Specifications, including certified depth and FHO (Free Height of Fall), where applicable." This ensures correct installation & compliance.

Proudly Australian owned and operated, with warehouses in Adelaide & Brisbane, we are the specialists when it comes to synthetic surfaces in Australia.

PlayKote Precoat recycled SBR is made from recycled black rubber SBR granules, factory coated with high grade colour pigments as per the choices above. PCSBR is a great budget choice, ideal for use in low to moderate usage environments.

IMPORTANT! If you believe your surface will experience high usage levels and/or will be installed on mounds and sloped surfaces, then it is recommended you consider using Playkote-Gezolan EPDM, as it is much more suited to these environments. PCSBR surfaces in such high use areas that experience colour fade, darkening and or surface pitting will not be considered a product defect. Please contact your sales consultant for further information and/or surfacing options.

*Colour: **Lighter colours such as Silver, Fawn and Caribbean** may experience a temporary yellow hue colour shift when installed with industry standard Aromatic Binders. The colour shift can last approximately 2-5 months, dependent on usage levels and UV exposure levels. Please ask your consultant about options available if this colour is selected and finished colour accuracy is important on your project.
